Five basic cooking methods are discussed and many tempting dishes are displayed. Produced in cooperation with the Poultry and Egg National Board especially for television showings, the running time of this film is such that it can be used for spot showings as well as part of regularly scheduled farm and home TV programs.

Pictured in this film are the promotional efforts in representative countries that have helped to make 1957 as the year that's breaking all agricultural export records. Also shows how agricultural trade groups and private industry team with the Government in building friendship and prosperity for us and our world neighbors. Viewers will see attaches in Europe, Latin America, and the Far East surveying crops, making consumer reports and actively promoting the use of American products at international trade fairs and in the foreign market place. WATER FOR THE WEST. 16 mm., sound, in color; also black and white; running time, 25 minutes. Released 1957.

The Rocky Mountain country furnishes water for millions of people and hundreds of communities all the way from the Mississippi River to the Pacific Coast. These majestic watersheds are almost entirely publicly-owned lands—the National Forests, managed by the forest rangers for timber, forage, recreation and wildlife, as well as for water. The Rocky Mountain Watershed is being hard-pressed to service increasing demands for clear water in constant, year-round supply. In addition to the work of the forest rangers, this film shows how the forest and watershed scientists at the Forest Service experiment stations right out in the forests and on the range, are trying to find the best ways to increase the yield of useful water without damaging the soil and the other important resources of the national forests. TV use permitted. (Not in film libraries; available for loan from regional offices of the Forest Service at Missoula, Mont.; Albuquerque, N. Mex.; Ogden, Utah; Portland, Ore.; San Francisco, Calif.; Milwaukee, Wis.; Atlanta, Ga.; and Upper Darby, Pa., and from Colo. State University, Ft. Collins, Colo.
